## Frontend Developer

---

### About Me

I am a German speaking Web Developer with experience in building web apps with JavaScript & Angular. You can find my projects that include responsive websites and business apps in my public portfolio. Starting a career in software development was the next logical step for me. Coming from a computer nerd family and helping my father build and fix computers as a young child, I discovered my interest and joy for IT.. So I decided to learn more about programming. I am looking forward to building on my experience and starting my career in IT in a junior developer position.

Main Stack:

- JavaScript
- TypeScript, Angular
- Angular Material Design
- HTML, CSS, SCSS, Bootstrap
- APIs (REST)

Side Stack:

- Git, Google Firebase

---

### Skills

- **Building Applications with JavaScript & Angular:** I built landing pages and several web apps as well as OOP-based Jump-and-Run-Games with the respective technologies.
- **Working in a Software-Team:** During learning coding, I did several group projects where I learned how to develop a software project in a team.
- **High sense of responsibility:** I am used to taking responsibility and working diligently as I always did in my job as a finance manager.
- **Stamina:** I've worked on many projects, so I've been debugging and solving problems very often. Because I'm very patient, I can keep a cool head and solve problems in a more structured way.

---
