Cagri Avsar

Frontend Developer

About Me

I'm a German-speaking web developer with experience building web apps with JavaScript & Angular. In my public portfolio, you will find my projects, including responsive websites and business apps. Coming from a computer nerd family and helping my father build and fix computers as a small child, I always wanted to start a career in IT. However, I could not take the direction immediately because I had to support my parents as my father was terminally ill. I had to work in the supermarket and I worked the night shift at UPS. After the death of my father, I started to intensively learn programming and build several projects while learning from experienced developers.

I am looking forward to building on my knowledge and experience and starting my career in IT in a junior developer position.

Main Stack:

- JavaScript
- TypeScript, Angular
- Angular Material Design
- HTML, CSS, SCSS, Bootstrap
- APIs (REST)

Side Stack:

- Git
- Google Firebase

Skills

- **Building Applications with JavaScript & Angular:** I built landing pages and several web apps as well as OOP-based Jump-and-Run-Games with the respective technologies.
- **Working in a Software-Team:** During learning coding, I did several group projects where I learned how to develop a software project in a team.
- **Taking responsibility:** I am used to taking responsibility and working diligently as I always did in my jobs & personal life.
- **Stamina:** I've worked on many projects, so I've been debugging and solving problems very often. Because I'm very patient, I can keep a cool head and solve problems in a more structured way.

Professional Experience
